

Project 2-1 Outline/Wireframe

- Topic

The topic of this site will be offering and facilitating legal services in a proper, professional, and efficient manner.

- Objective/Goals

The goal for this website will be for law firm to offer guidance or help people enduring difficulties because of a particular legal matter. To facilitate in making a possibly overwhelming situation a bit easier, the site will be organized into 4 main categories in hopes that the content will be presented and organized in a clear manner. The main categories will be the home page, the attorneys, family law, and information.

- Web Pages

the website will consist of the following web pages;

MAIN HOME PAGE

- Professional, modern landing page, including is brief and concise introductory paragraph of what the law firm is about and it's goal for each prospective client or client.
- Horizontal navigation bar, minimalist style, with links to home, family law, the attorneys, and infor web pages.
- Minimal footer with important contact information

FAMILY LAW

- The horizontal navigation bar and footer will be on this page as well.

This page will have a section briefly explaining family law.

- Photos will be included to visually communicate professionalism and credibility to earn trust.
- Section asking if their matter is a family law case and a list with common family law cases that the law firm has worked on. Images will be include.

ATTORNEYS

- The horizontal navigation bar and footer will be on this page as well.
- This page will be dedicated to the law firm's team, consisting of profile images of each lawyer, with a brief description of each person.

INFO

- The horizontal navigation bar and footer will be on this page as well.
- This page will have a little bit more detailed information on how the law firm's consultations system works and a call to action to encourage someone to contact office for a consult.
